Our User reviews

BOSSGTS would like to thank EdbMails for their amazing software - through this software, we were able to recover multiple damaged EDB database files, and successfully migrate data to a new, live exchange server. We personally recommend this solution to ANYONE stuck with mail downtime, and going forward, will not use any other software, other than EdbMails suite

- Darren - *South Africa*
https://bossgts.com

I have used the EdbMails to recover and migrate my Exchange EDB file to Office 365.

Nice software... I will indicate to my friends.

- Paulo Matos
Santo Andre, Brazil

Introduction

With cloud services like Office 365 and Exchange taking center stage in the digital age, migration, recovery and backups are becoming increasingly important. Companies and Organization migrate for a variety of reasons such as mergers, acquisitions, for legal compliances and so forth. Without proper assistance and guidance, migration can be a difficult task. This can be a stressful experience if it is not carried out with care and forethought. Important data may be overwritten or, in the worst-case scenario, permanently lost.

Backups are essential for bracing for unforeseen circumstances and events. With advances in digital technology, the threats that the industry must deal with can become prohibitively expensive. Email accounts can be hacked and private messages read. Other threats and problems include ransomware, data corruption, virus infection, and so on. A secure, reliable, and cost-effective migration and backup solution are required in such cases.

This whitepaper discusses EdbMails, a secure and reliable solution for all your migration, backup, and recovery requirements.

Our User reviews

I must say the EdbMails software is very good, I used it with the last Public folder migration on a large amount of folders and it did a fantastic job!

Thanks again!

– Kenedy Fitzgerald

The new Interface is just Amazing! All in one makes my day. All I can say is it's an amazing renovation of your site

Overview

EdbMails is an industry-leading, secure, trusted, and internationally recognized recovery, migration, and backup software delivering award-winning solutions to more than 150+ countries. It supports various offline recoveries such as Exchange recovery, Outlook recovery, OST file recovery, MBOX an NSF file recovery and online backup and migrations for Exchange, Office 365, SharePoint, OneDrive, and IMAP.

EdbMails allows you to securely migrate all of your data from a Live Exchange server or Office 365 to another account, resulting in significant cost and time savings. It can also perform offline recovery of an Exchange database file (EDB).

Who can benefit from the migration tool?

The application is intended to assist Exchange, Office 365 administrators, or users in their migration efforts and those looking for an upgrade or to relocate their Office 365 tenants to a different server. EdbMails supports all Office 365 plans, hosted Exchange Server, Windows small business server, and Exchange server versions. It enables both global administrators and specific users to migrate the mailboxes.

How does the application work and what does it migrate?

Without the use of an intermediary tool, the software migrates the source Exchange / Office 365 mailboxes to the target Office 365 / Exchange server. You only need to connect the source and destination servers; the tool will handle the rest. It migrates the specified mailboxes/folders / items in a single hop to the destination. EdbMails uses modern authentication to connect to your Office 365, which is based on ADAL (Active Directory Authentication Library) and OAuth 2.0, is known to be a secure authentication method to access your Microsoft Office 365 account.

Our User reviews

Having used EdbMails EDB to PST on numerous occasions I have always had success with recovering the data I needed. The software is easy to use, the interface is clean and intuitive. The support is excellent and I wouldn't have any problem recommending this software.

- Daniel Butterworth
United Kingdom

It is in fact a great product. You've saved myself countless sleepless nights of manually exporting individuals mailboxes of 10GB+ to PST and then importing back again to O365

– Ignatii
Portugal

To ensure high-performance migration, EdbMails is designed with multi-threading for migration operations. It has no restrictions on the domain, mailbox size, or item size. Furthermore, EdbMails is designed to manage Exchange Server throttling automatically with a wait and resume mechanism, ensuring a successful migration.

EdbMails Office 365 / Exchange migration software assists you in migrating your organization's Mailboxes, Public Folder, Shared mailboxes, and Archive mailboxes to Office 365 or Exchange. It automatically sets the required rights on both the source and target servers, performs mailbox mapping, and mailbox creation on the target Office 365 servers along with incremental migration thereby improving the migration efficiency.
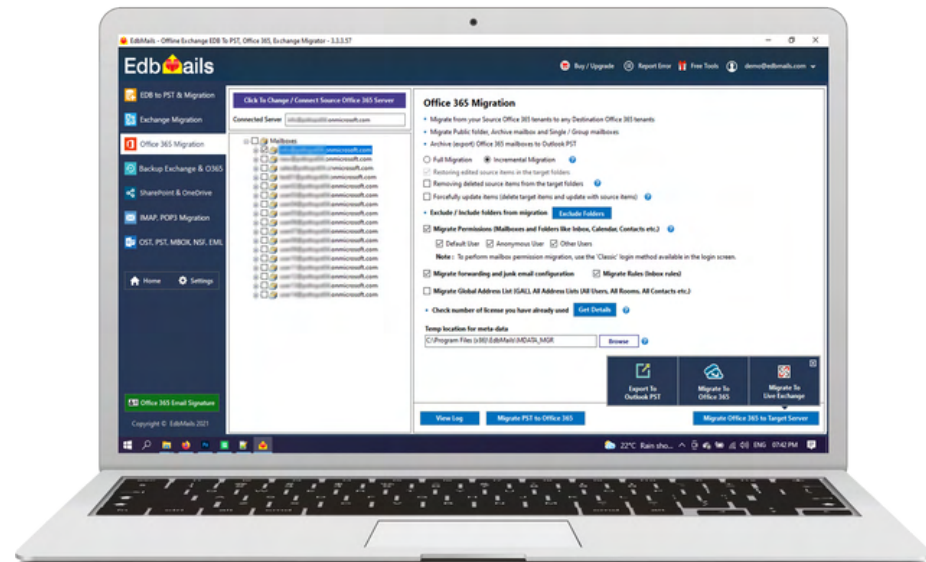

Offline Exchange Recovery

EdbMails can completely repair and recover your Exchange mailboxes from a corrupted or a dead Exchange server offline EDB file without the use of Exchange server services or Active Directory. Its simple interface allows you to complete your recovery easily with a few clicks.

Apart from exporting your mailboxes to PST, It can also migrate your mailboxes from an EDB file to your new Exchange server or Office 365 without the need for Outlook installation. It is designed to handle migration and export operations automatically, saving you time and effort in resuming email communication within your organization.
Offline Exchange Recovery

Live Exchange Migrations

Using EdbMails, migrating to/from Exchange Online or a hosted version of Microsoft's Exchange Server is relatively simple. Exchange Migrations can be completed without disrupting your Exchange server's services. EdbMails Exchange migration tool can handle both personal and enterprise-level migrations. It also supports direct mailbox migrations from Exchange 2003 to 2013, Exchange 2007 to 2016, Exchange 2010 to Exchange 2019, Exchange 2016 to Exchange 2019 from any old Exchange version to any new Exchange version including cross-forest and cross-domain migrations. Using EdbMails you can easily migrate your Exchange server to Office 365.

" We provide industry-leading technology for Exchange Recovery and Migration at both the personal and enterprise levels.

Live Exchange Migrations

Office 365 Migrations

You can migrate mailboxes from one Office 365 tenant to another using EdbMails Office 365 Migration. It can migrate entire mailboxes or specific folders to an Office 365 server in the same or a different domain. This migration is extermely beneficial in mergers and acquisitions. Office 365 migration automatically assigns impersonation rights to both the source and destination servers and can also map the mailboxes. In addition, it supports migrating public folders, archives and shared mailboxes from one tenant to another or from Office 365 account to live Exchange server.
Offline 365 Migrations

EdbMails

> EdbMails outperforms the competition and enables the use of a single product for all of your Exchange server and Office 365 needs.

Our User reviews

Lamentably, only couple of days back, I had lost all my association mails alongside considerable rundown of contacts and Recently I have used EdbMails EDB to PST Converter Software and it really worked like a pearl.

– Renato
Switzerland

EdbMails is by far the easiest software I've come across for any recovery and migration functionality. I could easily migrate large mailboxes, and the application requires no technical skills for people like me. This is one of the most significant benefits if you're looking for a software that can complete the task in the shortest amount of time.

Security and Compliances

EdbMails is a highly secure application that uses secure Microsoft APIs for migration and performs the migration as per the flow guided by Microsoft. Your credentials and data are NOT stored on our servers and safeguarded by OAuth 2.0 and TLS encryption during the authentication. In addition, the meta-data used for Incremental migration is saved on your computer and is encrypted using AES 256-bit military-grade encryption. The meta-data is completely restricted to your local computer where you are performing the migration. Furthermore, EdbMails is ISO 27001:2013 certified and GDPR compliant which ensures that the complete migration process is secure and that your data will never be used or saved on EdbMails servers during the migration process.

Why EdbMails is the best choice?

EdbMails is a simple and secure solution for recovery, migration, and backup requirements. It is an award-winning feature-rich tool that is designed to handle critical migration and recovery projects. It is unique with the features such as incremental (no-duplicate) migration, OAuth 2.0 modern authentication, automatic mailbox mapping, throttling management, the ability to migrate large mailboxes with data integrity, and so on. Furthermore, it offers all the business-critical features with low-cost pricing plans and discounts up to 75% and 24/7 free technical support. A free on-demand live product demonstration is available to know the working of the EdbMails in real-time and more information about the software.

Summary

Given the advancements in cloud-based solutions, data migration and backup are becoming increasingly important. EdbMails is your one-stop shop for Exchange and Office 365 recovery, migration, and backup needs. It is a secure, trustworthy, and cost-effective tool that includes features like incremental (no duplicate) migration, backup, Offline recovery, and automatic mailbox mapping, among others. It is ISO 27001:2013 certified and an excellent choice for both personal and commercial users.
